DUBAI CARGO VILLAGE · SINCE 2006 · ISO 9001:2015 CERTIFIED

Specialist logistics for high-value, irreplaceable cargo

05 **Dangerous goods** — Checked before they move

06 **Export crates** — Engineered around your cargo

08 **Exhibitions** — On the stand before the doors open

12 **Customs** — Documents checked first

EXPORT PACKING · AIR, SEA & ROAD FREIGHT · CUSTOMS · WAREHOUSING

SOLARBASECARGO.COM

AT A GLANCE

Twenty years in Dubai. Crate to customs.

Solar Base Cargo Packing L.L.C. is a third-party logistics (3PL) provider founded in Dubai in 2006. We design and build export packaging in our own workshop, then book the freight, clear customs and store the cargo from Dubai Cargo Village, beside Dubai International Airport (DXB).

ABOUT SOLAR BASE · SINCE 2006

Logistics built around our own workshop

Solar Base began in 2006 as a packing specialist for commercial and industrial cargo. Twenty years later, the team that designs and builds your packaging also books the freight, clears customs and delivers, so you deal with one accountable partner.

WHY IT MATTERS

When packing, freight and customs sit with different companies, every handoff is a risk to the cargo and the schedule. At Solar Base all three are handled in-house.

2006
Founded in Dubai
Started as a professional export-packing service.

2008
Freight forwarding
Import and export by sea and air from our Dubai hub.

2014
Major projects
Project cargo exceeding 1,000 metric tons for leading Dubai-based organizations.

2016
International
Joined global partner networks such as JCtrans, serving exhibition, media and model-making clients.

2018
Part of greatness
Logistics for the Burj Khalifa Media Façade.

2026
Twenty years
Packing, freight, customs, exhibitions and dangerous goods from two sites in Dubai Cargo Village.

01
Integrity
We do what we say, and tell you at once when something changes.

02
Professionalism
Trained people, clear documents and careful handling on every job.

03
Innovation
Better ways to pack, move and clear cargo.

04
Respect
For customers, colleagues, partners and the cargo in our care.

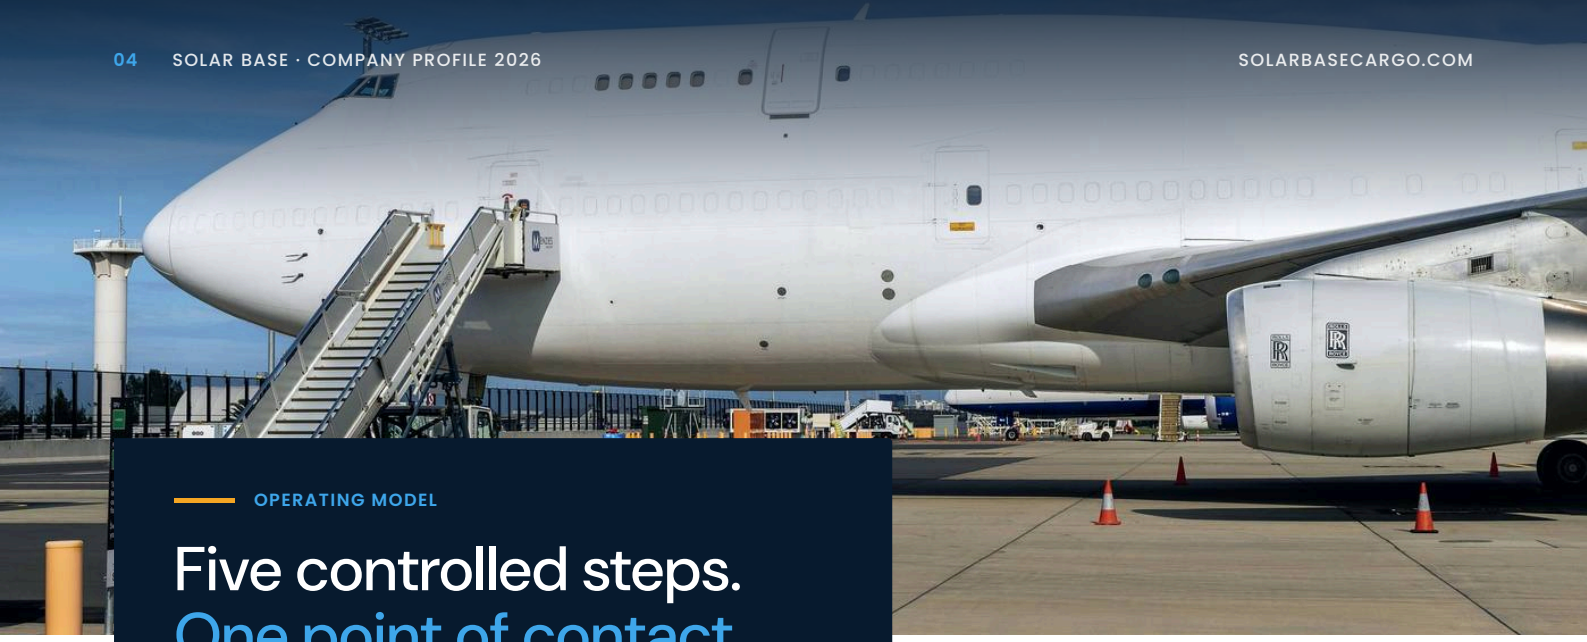
05
Quality
ISO 9001:2015 certified. Every job checked before dispatch.

VISION

To be a global leader in safe, sustainable, technology-driven logistics solutions.

MISSION

To be the world's most preferred logistics group, delivering creative, high-quality solutions across every logistics service.



OPERATING MODEL

Five controlled steps. One point of contact.

SURVEY › PACK › BOOK › CLEAR › DELIVER

One coordinator follows your cargo from the first survey to final delivery, with every step run from Dubai Cargo Village.

01 Survey
Dimensions, gross weight, center of gravity, fragility, declared value and route.

02 Pack
Crate, wooden box, pallet or skid built in our workshop to the agreed specification.

03 Book
Air, sea (FCL / LCL) or road capacity matched to your delivery deadline.

04 Clear
Documents checked before filing; duties, VAT and port charges settled.

05 Deliver
To your door, site, warehouse or exhibition stand.

DANGEROUS GOODS

Dangerous goods, checked before they move

Perfumes, batteries, fuel, aerosols and paints are dangerous goods, and they turn up in exhibits, show cars and machinery more often than shippers expect. We check the safety data sheet, confirm the classification with you, and pack, mark and document each consignment.

THE NINE UN HAZARD CLASSES

Explosives	Gases	Flammable liquids	Flammable solids	Oxidizers	Toxic	Radioactive	Corrosives	Miscellaneous
Fireworks, UN 0335	Aerosols, UN 1950	Perfume, UN 1266	Matches, UN 1944	Pool chlorine, UN 2880	Pesticides, UN 2902	Density gauges, UN 3332	Wet batteries, UN 2794	Li-ion batteries, UN 3480

01 **Submit**
You send the safety data sheet, quantities, packaging and route.

02 **Confirm**
UN number, class and packing group checked with you, the shipper.

03 **Pack**
UN-specification packaging matched to the UN number and packing group.

04 **Mark**
UN number, proper shipping name, hazard labels and handling marks.

05 **Declare**
Declaration, permits and carrier acceptance before the cargo leaves.

DOCUMENTS	SEA	ROAD
Declaration	DG declaration (IMDG 5.4.1)	DG transport document
Loading	Container packing certificate (IMDG 5.4.2)	Load secured and placarded
Transport	Bill of lading	Truck waybill
Dubai permits	SIRA approval for hazardous imports	SIRA hazardous-materials transport permit
Supporting	SDS · UN packaging certificate	SDS

The shipper remains responsible for classification. Rules follow the IMDG Code in force (Amendment 42-24, mandatory since January 1, 2026) and UAE.S 5060:2024 for road. As of October 2026.

UAE AUTHORITIES FOR DANGEROUS GOODS

SIRA, Dubai	Hazardous imports, road permits
Dubai Civil Defence	Hazardous storage and handling
Ministry of Interior	Explosives import permits
FANR	Radioactive material permits
Dubai Customs	Restricted goods release

PERFUME SHIPMENTS

Perfumes and fragrances ship as dangerous goods: UN 1266, Class 3 flammable liquids. We check the safety data sheet, then pack, label and declare each consignment for sea or road.

Samples and testers count too.

HIDDEN HAZARDS

Show cars and stands carry fuel, batteries, airbags, extinguishers, aerosols and paint. A fuel-powered car ships as UN 3166, a battery-electric car as UN 3171 or UN 3556.

Tell us at the exhibit-list stage, not at the terminal.

Shipping something hazardous? Send the SDS, UN number and route.

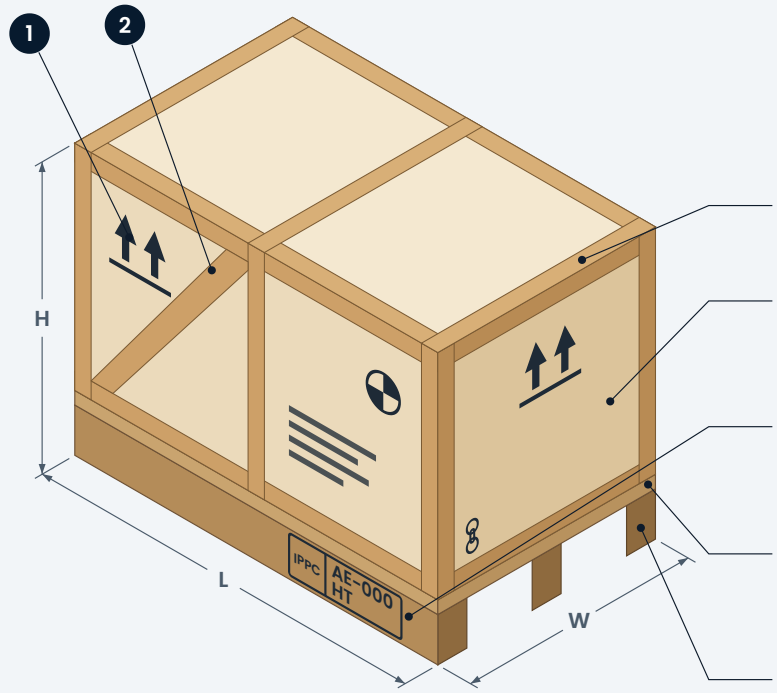
EXPORT PACKING & CRATING

Export crates engineered around your cargo

We design each package around the item's dimensions, weight, center of gravity, fragility and route, and build it in our own workshop.

CRATE ANATOMY · CLOSED WOODEN BOX ON RUNNERS



1. **Handling marks**
   ISO 780 symbols, center of gravity, case number, weights.
2. **Bracing**
   Diagonals stiffen the frame; blocking inside stops the contents moving.
3. **Frame and battens**
   Carry the stacking and lifting loads.
4. **Sheathing**
   Plywood panels, exempt from ISPM 15.
5. **ISPM 15 mark**
   On solid-wood parts such as runners and battens.
6. **Base deck**
   Load-bearing floor, sized to the footprint and weight.
7. **Skids / runners**
   Raised base for forklift entry and load spread.

M1
Pallet
Cartons and uniform goods, strapped.

M2
Skid
Runners bolted under machinery.

M3
Open crate
Framed crates for large or heavy items.

M4
Closed box
Fully sheathed for fragile or sea cargo.

M5
Stretch wrap
Holds and protects palletized loads.

M6
Carton box
Sized to the item in our workshop.

PLYWOOD CRATES, FORKLIFT LOADING

PALLETIZED AND STRETCH-WRAPPED

BUILT IN WAREHOUSE NO. 1230

- Wooden and carton boxes made in-house
- Packing and repacking on site
- Received, stored and dispatched from the same site
- In Dubai Cargo Village, beside DXB
- 3 t forklifts and labor, as needed

IPPC AE-000 HT

ISPM 15 mark, simplified: the real mark carries the IPPC symbol, country code AE, a producer code and treatment code HT.

PACKING SPECIFICATION

Packing specified per item, per route

Pallet, skid, open crate or closed wooden box: the choice sets the protection level, the chargeable weight and the paperwork at the border. Right-sized packing protects both the cargo and the freight bill.

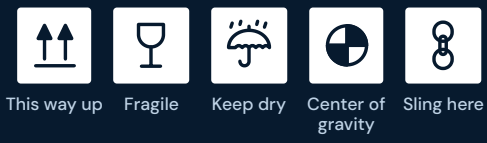
	 M1 Pallet	 M2 Skid	 M3 Open crate	 M4 Closed box
CONSTRUCTION	Flat timber platform; cargo strapped and wrapped on top	Heavy runners bolted under one item	Timber frame with open slats	Fully sheathed, often lined and cushioned
BEST FOR	Cartons and uniform goods	Machinery with a solid base	Large or heavy items needing structure	Fragile, high-value or sea-bound cargo; exhibitions
PROTECTION	Handling only	Base and forklift access	Impact; contents visible	Full enclosure
WEIGHT & COST	Lowest	Low	Medium; lighter than a closed box	Highest; reusable for return trips
ISPM 15	Solid-wood pallet: HT and marked	Solid-wood runners: HT and marked	Solid-wood frame: HT and marked	Plywood exempt; solid-wood battens and runners marked

ISPM 15 · HEAT TREATMENT

56 °C / 30 min

Solid wood over 6 mm thick is debarked, heated to 56 °C at the core for 30 minutes and marked. Plywood and other processed wood are exempt.

ISO 780 · HANDLING MARKS



Pictorial marks every handler reads, whatever language they speak.

VOLUMETRIC · AIR

6,000

cm³ per kg

L × W × H (cm) ÷ 6,000 = kg

Charged on the greater of gross and volumetric weight.

QUALITY CHECKS · ISO 9001:2015

01 **Sample approval**
Packing spec agreed before the build

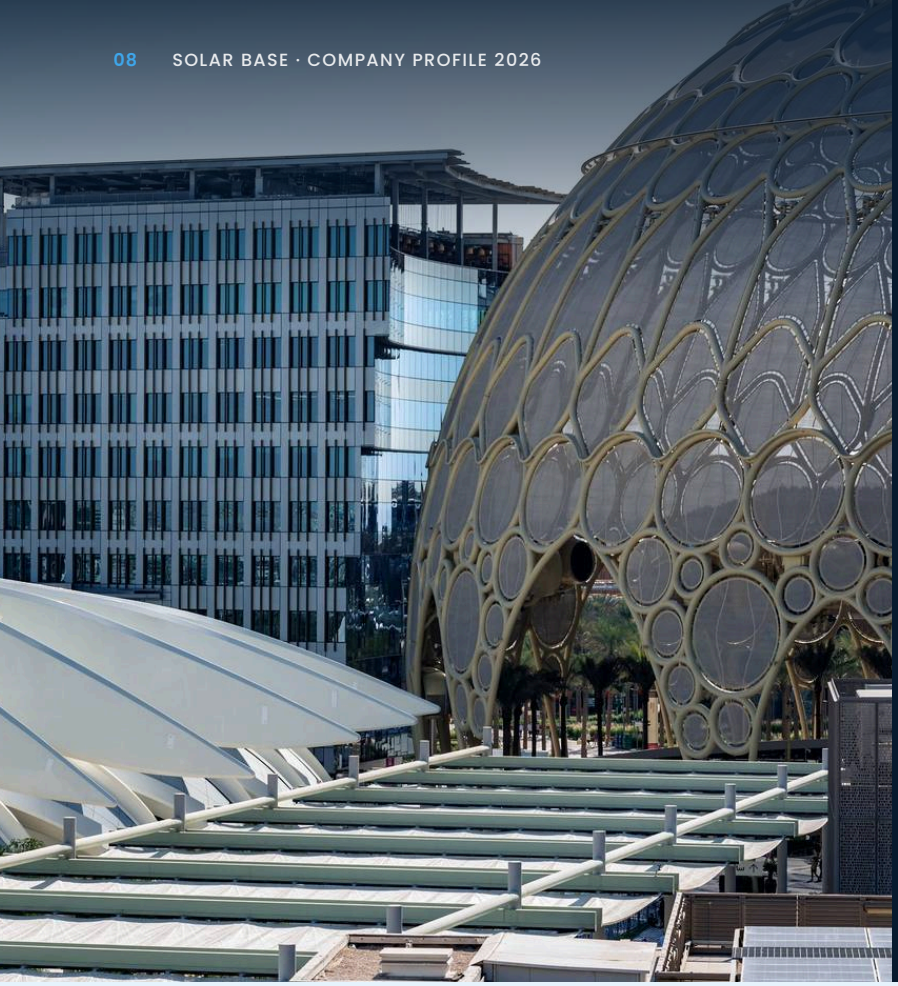
02 **Materials check**
HT solid wood and plywood panels

03 **Build in our workshop**
Warehouse No. 1230, Dubai Cargo Village

04 **Pack, block and brace**
Cargo secured and marked to ISO 780

05 **Final inspection, then dispatch**
Checked against the agreed specification

PACKING SPEC · EXAMPLE	CASE SB-0001
TYPE	Closed wooden box on runners
EXTERNAL	180 × 120 × 140 cm · 3.02 m³
GROSS / NET	620 / 455 kg
VOLUMETRIC · AIR	504 kg · chargeable 620 kg
MATERIALS	HT runners · plywood panels
MARKS	ISO 780 symbols · case no. · gross / net



EXHIBITION LOGISTICS

On the stand before the doors open

Our exhibition team handles everything exhibitors and organizers need: crating, freight, customs, storage, delivery to the venue, on-site handling and the return journey, all on one schedule.

MAJOR UAE VENUES

- Dubai World Trade Centre, Dubai
- Dubai Exhibition Centre, Expo City
- ADNEC, Abu Dhabi

FEATURED PROJECT · PAGE 13

Formula 1 show cars, crated on their wheels in our workshop and delivered with on-site handling.

4 weeks
Typical planning lead time before move-in

3 t
Forklift capacity on site, with labor*

14
Exhibition services, listed on page 09

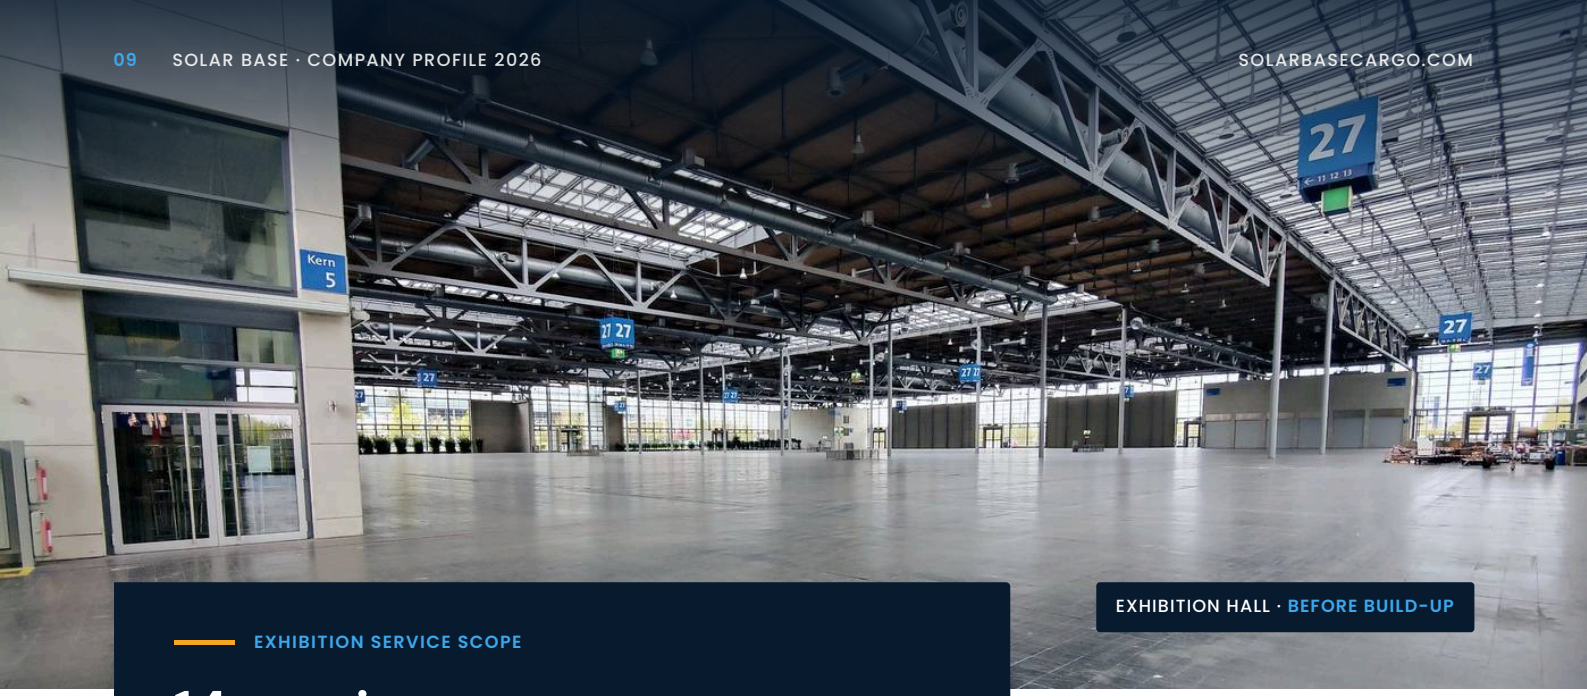
2 weeks
Typical re-export filing after close

TYPICAL UAE SHOW · WEEKS FROM MOVE-IN

OFF-SITE · AT THE VENUE · DOORS OPEN

PHASE	-4	-3	-2	-1	Show week	+1	+2
Plan Exhibit list, packing spec, mode	Week -4						
Pack & ship Crates, documents, freight booked		Weeks -3 to -2					
Arrive & clear ATA Carnet or temporary admission				Week -1			
Move-in Delivered to the stand, with labor and forklifts							
Show days Empty cases removed and stored							
Move-out Exhibits repacked, cases returned							
Re-export Re-export documents filed						Weeks +1 to +2	

Typical timings: each show's shipping manual sets the exact deadlines. *Forklift and labor supply is subject to venue and official-contractor rules. Formula 1 names and team liveries are trademarks of their owners; no endorsement is implied.



EXHIBITION HALL · BEFORE BUILD-UP

EXHIBITION SERVICE SCOPE

14 services, one schedule

Every step of a UAE show, from exhibit list to re-export. Temporary-import rules are built into the plan from the first day, not fixed at the border.

01 -4 TO -1 WEEKS

Before the show

Planned from your exhibit list.

- Exhibits management
- Freight by air, sea and road
- Customs documentation
- Statutory port and airport charges
- Storage before the show

ENDS: CARGO CLEARED, WEEK -1

02 SHOW WEEK

At the venue

From move-in to move-out.

- Transport and delivery to site
- On-site handling
- 3 t forklifts and labor, as needed
- Supervision by our representative
- Removal and storage of empty cases

ENDS: MOVE-OUT COMPLETE

03 MOVE-OUT TO +2 WEEKS

After the show

Exhibits home, paperwork closed.

- Return of empty cases
- Collection to port, airport or storage
- Re-export documentation
- Delivery back to origin

ENDS: RE-EXPORT FILED, +2 WEEKS

BRINGING EXHIBITS INTO THE UAE

AS OF OCTOBER 2026

2011
ATA Carnet
Accepted in the UAE since 2011 and issued by Dubai Chambers.

6 months
Carnet re-export limit
Carnet goods must leave the UAE within six months.

3 gateways
Entry points
Jebel Ali port, DXB airport and the land borders, under carnet or temporary admission.

FINAL IMPORTS
Giveaways, brochures and food samples pay duty, with a real value on the invoice.

Exhibiting in Dubai or Abu Dhabi?
Send your exhibit list four weeks out.

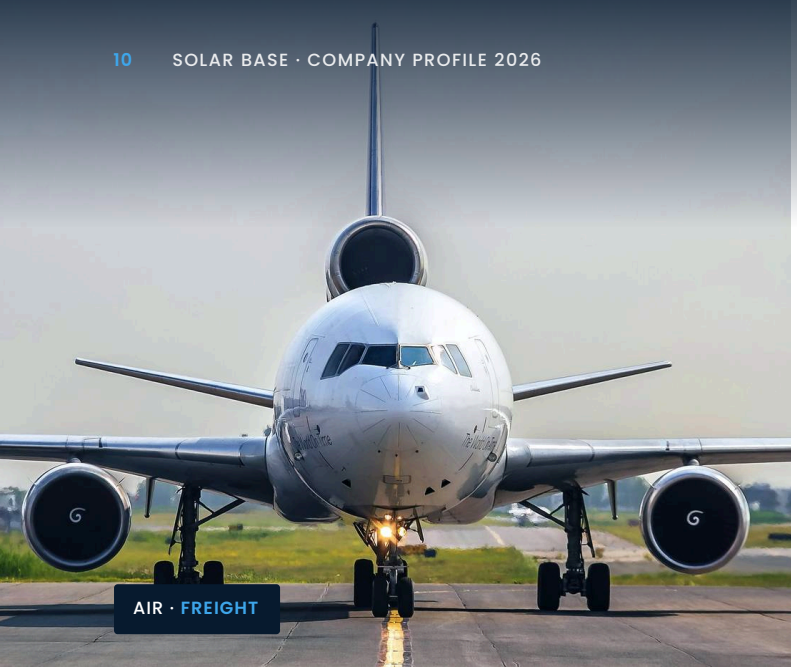
FOR A MOVE-IN PLAN, SEND

- Show name and dates
- Hall and stand number
- Exhibit list with dimensions and weights



AIR & SEA FREIGHT

Crated and cleared in Dubai, shipped by air or sea

Each shipment is managed from our workshop to the aircraft or vessel.

Air freight

Import and export air freight from our base at DXB, with flexible flight options. We crate, document and clear each shipment ourselves and liaise with dnata at DXB for cargo acceptance and release.

AIR ULD	BASE, CM	DECK
PMC pallet	318 × 244	Main / lower
PAG pallet	318 × 224	Main / lower
LD3 container	156 × 153 · h 163	Lower

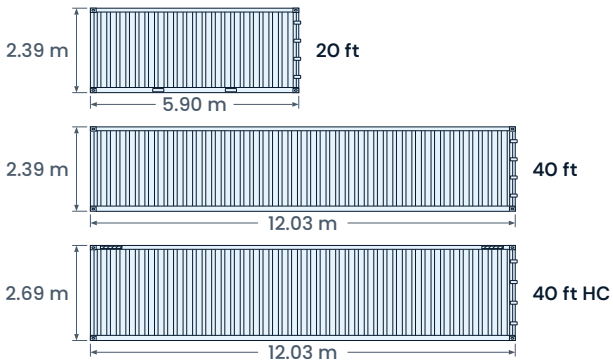
Typical IATA unit load devices. Usable height depends on the aircraft and deck; confirmed per carrier.

CHARGEABLE WEIGHT · AIR	EXAMPLE
VOLUMETRIC	L × W × H (cm) ÷ 6,000 = kg
CHARGEABLE	Greater of gross and volumetric
EXAMPLE CRATE	120 × 80 × 100 cm · gross 150 kg
CALCULATION	120 × 80 × 100 ÷ 6,000 = **160 kg**
GROSS	150 kg
VOLUMETRIC	160 kg · chargeable

Sea freight: FCL and LCL

Full container load (FCL) and less-than-container load (LCL) shipments to and from ports worldwide, through our partner network. Crating, customs clearance, delivery orders and warehousing are handled in Dubai.

TO SCALE · INSIDE DIMENSIONS



CONTAINER	INSIDE L × W × H	VOLUME	PAYLOAD*
20 ft	5.90 × 2.35 × 2.39 m	33 m³	28 t
40 ft	12.03 × 2.35 × 2.39 m	68 m³	26.5 t
40 ft HC	12.03 × 2.35 × 2.69 m	76 m³	26.5 t

*Typical values; exact figures vary by carrier and container. HC: high cube. LCL is charged per revenue ton: the greater of volume in m³ or weight in metric tons.

Need a rate?
Send route, dimensions and weight.
